Foreword

The atmosphere which pervades a well appointed home — who can define it!

SUCH a home owes its charm to many things—chief among them to a decorative scheme which includes wall coverings, pictures, draperies, furniture, rugs — and, above all, to the perfect lighting system without which this subtle harmony must needs be dimmed or lost completely.

With all the consequent importance that this gives to lighting fixtures in general, the most personal, most individual feature in the decorative scheme is still the portable lamp. It can make or mar a room. Due care should be exercised in its selection. Where possible this should not be done by proxy — but personally, from an inspection of the actual lamps in all their satisfying variety of shapes, colors, and materials. Where this is not possible, reliance can safely be placed in the illustrations on these pages, and selection made by mail.

This booklet illustrates from actual photographs representative examples of a line of electric portables to be had only of us, and ranging from most inexpensive to moderate in price. All alike are distinguished by utility, simplicity of design, gracefulness and balance in outline, harmony in coloring, and capacity for perfect illumination. Among these and many others on display in our fixture studios, you are sure to find the lamp that best expresses your personality and harmonizes with the fittings of your home. These lamps are also greatly appreciated as holiday, wedding, and birthday gifts, and serve as an enduring reminder of the giver.

Body of Green and Opal glass
Border of Amber and Opal
Old Brass finish

19075

Height 22 inches
Diameter of shade 17 inches
Body of Gold and Amber glass
Border of Green
Flemish Old Brass finish

ALONG with the lamps of relatively standard shapes and materials previously illustrated, you will find on the following pages a number of designs which will particularly appeal to those in search of new forms of lighting expression.

Although some are novel in conception, these lamps are one and all delightful examples of perfect taste in shapes, materials, and colorings. The elegance and quiet richness of the silk coverings with their soft, pliable textures contrast agreeably with the more rigid outlines of the metal standards. The silks are carefully chosen for durability; the colors are those which can be depended on to retain their freshness. After several years' wear, or whenever it is desired to vary the form or coloring, the construction of the shades permits them to be readily and inexpensively recovered at home.

Exquisite are the pottery lamps in their lustrous and dull matte glazes. These rare tones and textures are made possible by a newly discovered method of high firing, with results which suggest vividly the famous work of Chinese artisans. The shades, also of pottery, and beautifully inlaid with selected, vari-colored crystals, are chaste and cool by day—but at night brilliant in their gem-like colorings, yet restful in the soft, mellow warmth of their illumination.

Illustrations can in no wise do justice to any of these lamps. You are accordingly invited to visit our fixture studios and inspect our splendidly complete line of fixtures and portable lamps. You will be made welcome, yet not urged to buy.

19083

Height 24 inches
